

Useful APPS and revision websites

1. Keep All about organisation: from reminders to checklists – this app has it covered.

- Image to Text is a great feature that allows you to grab text from photos. Students can take photos of their notes and off they go!

2. Quizlet

• A study and flashcard app, Quizlet lets you create quizzes with your own information.

- There are also 400 million quizzes already available across a wide range of areas.

3. Padlet

• The easiest and quickest way to collaborate. Students can create a shared space where everyone can share ideas, links, images and tips.

- The link can be shared with everyone in a class, allowing everyone to add in their information, save as a pdf and send to everyone!

4. Popplet lite

• A beautifully simple way to create mind-maps.

- In this free version you are only allowed to create one popplet, so when you're finished one, why not save a screenshot and start on a new topic!

5. Spark Post

• Make revision less boring by illustrating important quotes.

- The final image would fit nicely in the centre of a popplet (app 4).

6. Clips

• On Clips you can create short clips with live annotations!

- I recommend changing the language of your device; use the videos to test your pronunciation for MFL.

7. Classic Explain Everything

• The only paid app on this list. EE is my go to for any subject.

- Import a photo, video or popplet, then add your voice explaining what you want to remember: blurt out all the vocabulary, processes and dates you need!

8. TextingStory

• A fun little app where you can create a video of a 'text conversation'.

- Create common answers to questions in a fun and visual way!
- Try importing your video to Explain Everything and practice your accent!

9. Gojimo

• Already the UK's most used revision app! It has over 40,000 practice questions ready to go and free!

- Focus on the specific areas you need to work, with instant feedback.

10. Paper by FiftyThree

• Visually representing your information can save thousands of words.

- This app along with the others here has made my scrawl look beautiful!
- Appsmash this with SparkPost and Explain Everything to produce a video explaining processes and forming answers that words cannot suffice.
