

**Curriculum Progression Pathway for The Visual Arts (art & photography)**

**Subject Intent:**

**Why is the study of the visual arts important?**

To develop a visual literacy in order to express, communicate and translate their identity, emotions, ideas , opinions, environments and the world around them in a creative, expressive and analytical way

The art and photography courses lend themselves to a wide range of Spiritual, Moral, Social and Cultural studies. Students will analyse, engage with and question their own and others work, identify how beliefs, values and meanings are expressed and shared. Students are encouraged to express themselves through their art and photography, which is supported by strong research into the wider world around them.

This exciting, creative and practical GCSE is comprised of two parts. Students will produce a portfolio of Controlled Assessment work; this will add up to 60% of their overall grade. In the Spring Term of Year 11 students will undertake an Externally Set Task, this is a project set by AQA and is worth 40% of their GCSE grade.

**What skills will the study of the visual arts teach students?**

- Analytical research skills

- Resilience
- Patience
- Concentration/focus
- Independent enquiry
- Organisational skills & time management
- Communication visually/orally/written
- Taking a pride in their work.

**What will students know and understand from the study of the visual arts?**

Students are encouraged during the course to produce project-based work using a variety of different two and three-dimensional media. Students are encouraged to record observations; analyse images/artefacts; develop their own ideas relating to the theme and produce a personal response.

- Research skills to develop an understanding of their own work in context to professional artists, crafts people/designers.
- Accurately apply techniques of other artists to support the development of their own work and ideas.
- Experiment with a range of materials, processes and techniques.
- Develop abilities and methods of recording skills drawing/painting/printing/ceramics/Photography
- Produce a final outcome after a 'process' – these key skills link directly to the four assessment objectives at GCSE and so provide a basic understanding of process.
- Presentation skills

**How does the study of the visual arts support students learning in other subjects?**

#### Cultural Development in Art & Photography

Throughout the units of work explored Students will develop their knowledge and understanding of artist's ideas and concepts identifying how meanings are conveyed. Students will be exposed to a wide variety of cultures, beliefs and religions and have the opportunities to respond to them as part of their research and preparation work. Aspects of these skills are transferrable. In elements of the projects delivered there are links with other subjects, for example in year 7, we look at the history of portraiture and look at King Henry VIII.

#### **How can you deepen students' understanding of the visual arts?**

The Art, design and photography courses are dependent on the students' ability to enquire and communicate their ideas, meanings and feelings. Students will investigate visual, tactile and other sensory qualities of their own and others work. We encourage independent thinking that will enable students to develop their ideas and intentions and express these in an appropriate manner. Students will have opportunities to explore a range of starting points that may relate to social, moral, spiritual and cultural references within the research stages and will be developed within their own responses.

#### **How can the visual arts support students' future progression?**

Can you think of any man made object that has not been designed or created before production? We live in a world surrounded by art, craft and design – from the mobile phones we all use, the clothes we wear, the cars we drive, the movies we watch, the video games we play – all of these things and more are created – probably by people who will have an art/design background. There are a multitude of further education courses within the visual arts that can lead to careers within hundreds of industries and occupations

In a world where we are constantly bombarded with visual imagery, visual literacy is increasingly important. A career within the Arts is possible, with hard work, dedication and commitment. This qualification can be studied in Higher Education and can lead successfully to many career paths: designer, animation, freelance artist, advertising, illustration, photographer, film and television, architect, interior designer, textile designer, fashion, teaching and gallery work/curator.

**Exam board used in Y10 & Y11**

AQA GCSE Art & Design (60% coursework, 40% final exam) Unendorsed. Course code 8201  
 AQA GCSE Photography (60% coursework, 40% final exam) Course code 8206

CURRICULUM PROGRESSION PATHWAY

	Year 7	Year 8	Year 9	Year 10	Year 11
<b>Autumn 1</b>	<b>The Visual Elements, leading to watercolour painting skills:</b> <i>Understanding and applying the formal elements in art of:</i>	<b>Plants – leading to detailed observational studies:</b> Students will develop their ability with direct observational drawing skills using pencil, biro	<b>Creative Alphabet Design skills</b> <b>3D card sculpture:</b> Building on prior knowledge & understanding of design processes, independent	<b>Open project- learning how to build a project and provide evidence of the four assessment objectives using past AQA exam</b>	<b>Mock exam</b> from past AQA papers Students will again work through evidencing AO's 1-4. This work will be included in their coursework portfolio

	<p><i>line, shape, form, colour, pattern, tone and texture. (key words/terms/literacy) Students will then focus on colour theory (primary, secondary, complimentary colours, shades and tones) develop painting skills, brush control, accurate mixing, blending and layering paint.</i></p>	<p>and then paint. We explore contextual studies of artists including Henri Rousseau and Brian Froud and develop research analysis skills including written personal responses to their work. We use the techniques of these artists to influence student's own work. We further explore drawing and painting techniques to explore perspective and viewpoints, as well as scale and composition techniques.</p>	<p>enquiry and 2D – 3D realisation and intentions, students are encouraged to further develop creative thinking and independent enquiry. They will learn how to draw letter shapes and forms in three dimensions and use their own resources to create a design for a 3D card sculptural letter form. We explore viewpoints and perspective as well as rendering skills.</p>	<p><b>papers</b> AO1, 3(artists studies and own recording). In GCSE Photography the project starting point is 'Phobias &amp; Rituals'. Students research and apply the techniques/concepts of the artist/photographer within the development of their own work. Students will take a series of photographs to support their own ideas and use them to create their own artwork from.</p>	<p>worth 60% of their overall grade.</p>
